SUMMARY

AI/ML Engineer and Python Backend Developer with 3+ years of experience designing and deploying production-ready AI applications, scalable backend systems, and cloud-native services. Skilled in Python, FastAPI, Generative AI, RAG, LangChain, Prompt Engineering, and AWS, with a track record of delivering production-grade LLM applications and optimizing backend performance.

EXPERIENCE

Python Developer

Cartrabbit | Coimbatore | Jul 2024 – Present

- Developed AI-powered applications using Python, FastAPI, LangChain, and LLM APIs including OpenAI and Claude.
- Built Retrieval-Augmented Generation (RAG) solutions using FAISS, embeddings, and semantic search for document-based question answering.
- Designed document ingestion and processing pipelines for PDF, DOCX, and web content, including chunking, embedding generation, retrieval, and LLM-based response generation.
- Engineered LLM workflows and prompt strategies to improve response quality and support AI-powered product features.
- Developed scalable REST APIs using FastAPI and Flask and integrated AI capabilities into backend applications.
- Integrated external and payment APIs and containerized applications using Docker for deployment.
- Investigated and resolved 20+ production issues monthly, improving application reliability and reducing recurring incidents.

SKILLS

Languages: Python

AI/ML: Generative AI, LLMs, LangChain, Prompt Engineering, Agent Workflows, Tool/Function Calling, RAG, Embeddings, Pandas, NumPy, model evaluation

Backend: FastAPI, Flask, AsyncIO, Pydantic, JWT Authentication, Microservices

Frontend: React, TailwindCSS

Databases: PostgreSQL, FAISS, Pinecone

Cloud & DevOps: AWS (EC2, SSO, Bedrock, IAM, Lambda), Docker, Git, Bitbucket Pipelines(CI/CD)

PROJECTS

AI Code Review Assistant

Tech Stack: Python, FastAPI, LangChain, OpenAI, FAISS

- Built an AI-powered code review platform integrating LangChain, RAG, and semantic search using FAISS embeddings. Reduced manual code review effort by 40% through AI-assisted recommendations.

RAG-Based AI Assistant

Tech Stack: Python, FastAPI, LangChain, FAISS, OpenAI

- Built a domain-specific AI assistant using RAG with an automated PDF/web-document ingestion pipeline. Reduced document analysis time by 70% while improving information accessibility.

EDUCATION

Bachelor of Technology (Information Technology)

Kongunadu College of Engineering and Technology | 2019 – 2023

- CGPA: 8.9 / 10
